

GSE230538 cell-state composition benchmark

Observed scGen‡ WOT*‡ CellRank‡‡ Leca-VC

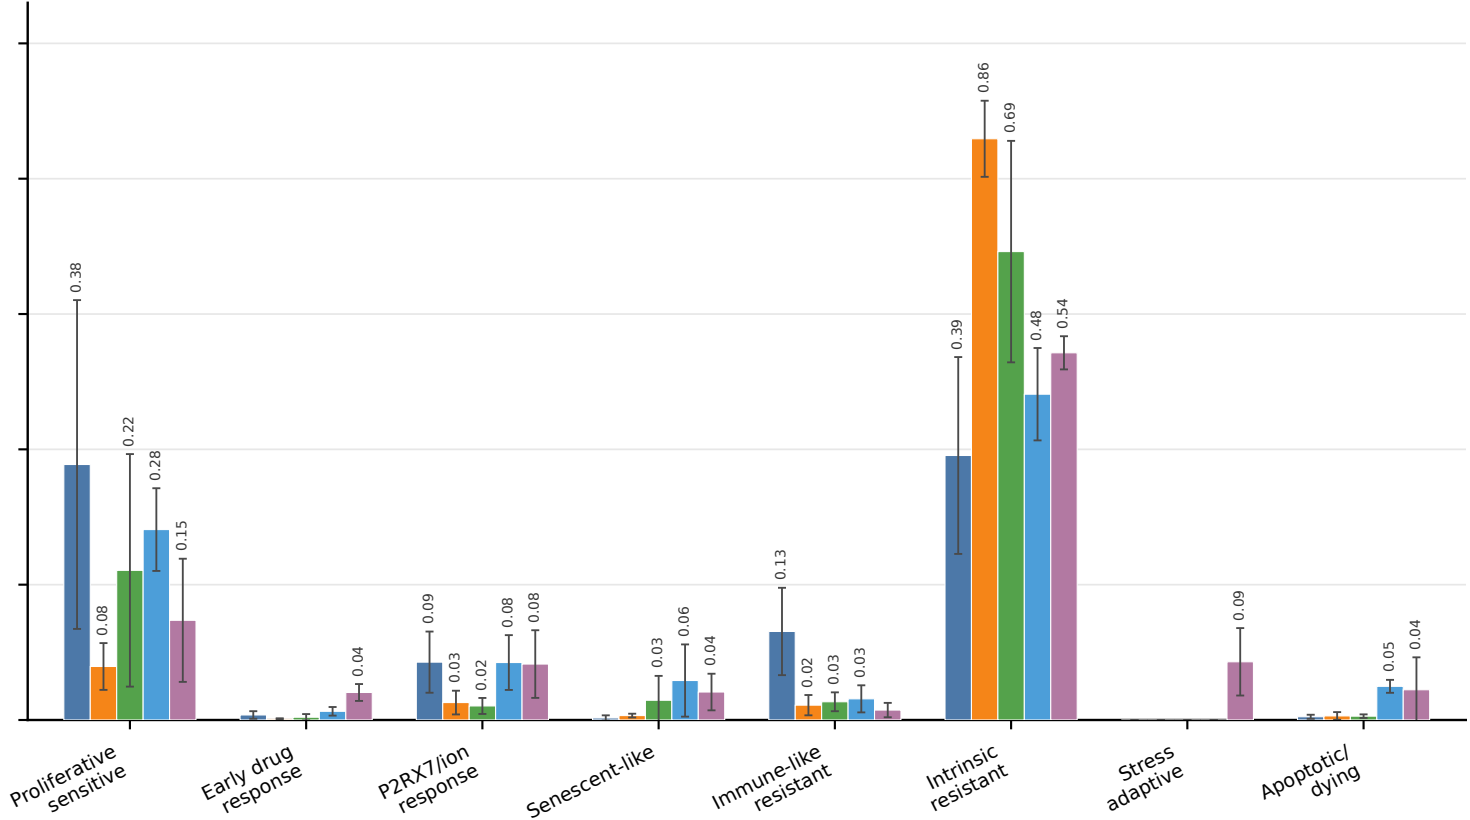

A. Day 4 held-out

scGen‡ 0.160 WOT*‡ 0.136 CellRank‡‡ 0.036
Bar-mean RMSE: Leca-VC 0.031

B. Day 33 held-out

scGen‡ 0.201 WOT*‡ 0.128 CellRank‡‡ 0.064
Bar-mean RMSE: Leca-VC 0.112

Bars show means; error bars are ± 1 population SD across four cell lines (Observed and external proxies) or three frozen seeds (simulations).

‡ Expression-derived deterministic composition proxy, not a native single-cell prediction. * WOT is target-derived; ‡ CellRank is an untreated-only, day-invariant terminal-expression proxy.
